FEATURED PROJECTS

Personal Portfolio — *AI-Integrated Developer Portfolio* · React · TypeScript · Vite · Tailwind CSS · Framer Motion · Gemini API

- › Rebuilt from scratch with React, TypeScript, and Vite; integrated the Google Gemini API through a secure Vercel Serverless Functions backend, keeping API keys out of client-side code.
- › Connected the GitHub REST API for live project data, and added smooth transitions with Framer Motion.
- › Set up automated testing (Vitest, React Testing Library) and a GitHub Actions CI/CD pipeline for automated deployment to Vercel.
- › Optimized for accessibility, SEO, and performance; resolved production issues through structured debugging.

JobMatch — *Full-Stack Job Matching Platform* · React · Node.js · Express.js · MongoDB

- › Built a full-stack platform for browsing job listings, applying, and managing applications, with authentication, protected routes, and user profiles.
- › Designed and integrated RESTful APIs with a responsive interface optimized for desktop and mobile.

Maison D'Isra — *Pastry Brand Website* · React · JavaScript · CSS3 · Responsive Design

- › Designed a modern, responsive UI with reusable React components and consistent visual branding.
- › Additional Projects: built 30+ further frontend, backend, and full-stack projects — more on GitHub and portfolio.
