PROJECTS

Personal Developer Portfolio | Live | GitHub
React, TypeScript, Vite, Tailwind CSS, Framer Motion, Gemini API, Vitest, GitHub Actions, Vercel
- Rebuilt my portfolio with React, TypeScript, and Vite, with UI animations built in Framer Motion.
- Integrated the Google Gemini API through Vercel Serverless Functions, keeping the API key out of client-side code.
- Integrated the GitHub REST API to display project information.
- Added automated tests with Vitest and React Testing Library, and configured a GitHub Actions CI/CD workflow for automated checks and deployment.
- Worked on accessibility, SEO, responsive design, performance, and production debugging.

Travel E-Commerce — Full-Stack Application | GitHub
React, Node.js, Express.js, MongoDB Atlas, Mongoose, Zod, Cloudinary, Multer, Postman
- Developed a React frontend and a REST API with Node.js, Express.js, and MongoDB Atlas (Mongoose).
- Implemented authentication and authorization, plus admin functionality for categories, products, orders, coupons, and users.
- Added request validation with Zod and image uploads with Multer and Cloudinary.
- Tested API endpoints with Postman, including admin login and category/product operations; prepared seed data (6 categories, 6 products, TRAVEL10 coupon).

JobMatch — Full-Stack Job Matching Platform
React, Node.js, Express.js, MongoDB
- Built job listing and job application features with authentication, protected routes, and user profiles.
- Integrated the React frontend with a REST API and built a responsive interface.

Maison D'Isra — Pastry Brand Website | Live
React, JavaScript, CSS3, Responsive Design
- Designed a modern, responsive website for a pastry brand, with reusable React components and consistent visual branding.

Additional work: 30+ independent learning and portfolio projects (frontend, backend, and full-stack) — see my portfolio and GitHub.
